

The Vienna Graduate School of Population Genetics

**Apply by
April 01, 2024**

www.popgen-vienna.at

provides an exciting training opportunity for highly motivated, outstanding **PhD students** with a background in one of the following disciplines:
bioinformatics, mathematics, statistics, evolutionary genetics, theoretical or experimental population genetics.

Available topics include:

- Adaptation from reduced genetic variation.
- Adaptation to complex environments.
- Inference of selection signatures from time-series data.
- Long-term dynamics of local *Drosophila* populations.
- Making sense of whole-genome polymorphism data
- The role of deleterious mutations for adaptation and maintenance of variation.
- Unraveling the impact of gene flow during species divergence.
